Office Action Summary	Application No. 10/674,142	Applicant(s) FERNANDEZ ET AL.	
	Examiner William J. Deane	Art Unit 2614	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Information Disclosure Statement

The information disclosure statement filed 03/07/2005 fails to comply with 37 CFR 1.98(a)(1), which requires the following: (1) a list of all patents, publications, applications, or other information submitted for consideration by the Office; (2) U.S. patents and U.S. patent application publications listed in a section separately from citations of other documents; (3) the application number of the application in which the information disclosure statement is being submitted on each page of the list; (4) a column that provides a blank space next to each document to be considered, for the examiner's initials; and (5) a heading that clearly indicates that the list is an information disclosure statement. The information disclosure statement has been placed in the application file, but the information referred to therein has not been considered. No 1449 form was received.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1 – 2, 4 – 5, 7 and 14 are rejected under 35 U.S.C. 102(b) as being anticipated by EP 1 096 770 (Bauer et al.).

With respect to claims 1 – 2, 4 – 5, 7 and 14, note paragraphs 0022 and 0023. In addition, note the Abstract and Fig. 5.

Claims 1 – 3 and 5 – 10 and 14 rejected under 35 U.S.C. 102(b) as being anticipated by U.S. 6,122,346 (Grossman).

With respect to claims 1 – 3 and 5 – 10 and 14, note the Abstract and Col. 3, line 33 – Col. 4, line 54.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 11 - 13 rejected under 35 U.S.C. 103(a) as being unpatentable over either Bauer et al or Grossman in view of U.S. Patent No. 5,933,488 (Marcus et al.).

It is believed that paging is inherent in both Bauer et al and Grossman, but neither explicitly recites a paging signal. However, paging is well known in the art as shown by Marcus et al. (see at least the Abstract). It would have been obvious to one of ordinary skill in the art to have incorporated such paging means as taught by Marcus et al. into either Bauer et al. or Grossman as such would only entail the substitution of one well known notification means for another or the addition of a well known signaling means.
